Letter from the Event Head

Dear Participant,

Warm greetings from Lilavatibai Podar High School.

It gives me great pleasure to welcome you to LPHS' signature commerce fest, Crescendo 2026. Crescendo proudly celebrates its 6th edition this year, and one of its flagship events, Recessus Consensus, marks its 4th edition with equal pride. Since its inception in 2023, Recessus Consensus has evolved from a multinational forum where students represented only the Great 5 Nations into an Indian body that gives voice to students across the country on Indian affairs, discussed in an intrinsically Indian manner.

The months following Crescendo 2025 have witnessed tumultuous global changes and the emergence of a new world order. The rise of "Trumponomics" has seen Trump's policies wreck multiple economies while simultaneously causing massive booms in others. At the same time, documents such as the Epstein files have upended geopolitical and financial structures, with influential figures including Donald Trump, Prince Andrew, Bill Gates, Hardeep Puri, Al Gore, Hillary Clinton, and Bill Clinton named in the files, and their reputations coming under fire. Moreover, Iran's government is facing massive turmoil after American-Israeli actions against Iranian aggression resulted in a quasi-war situation. Regions such as Dubai, Abu Dhabi, Manama, Doha, Baghdad, Aleppo, and Damascus have come under heavy drone fire from Iran due to the presence of American bases in these countries.

The year 2026 has already been deeply shaped by American policy. January saw the fall of the Maduro administration in Caracas due to American intervention, February witnessed an all-out civil war-like situation in Mexico after the Mexican government killed major cartel players with American aid, and March began with massive conflict in the Middle East. The world as we know it is changing rapidly. Afghanistan and Pakistan are at war over borders, the liberation of Gaza continues amid intense fighting, and Ukraine persists in resisting Russian invasion but is slowly running out of aid as Trump grows bored with Eastern Europe.

This year, Recessus Consensus 2026 aims to examine these very issues and their impact on developing countries like India.

I look forward to seeing you at Crescendo 2026!

Warm regards,

Garima Verma

Event Head

Recessus Consensus

Introduction

Recessus Consensus is a dynamic crisis simulation designed to challenge participants to think critically about the forces shaping the global economy and the political decisions that influence them. As part of Crescendo 2026, Lilavatibai Podar High School's flagship commerce fest, the event brings together students from across institutions to engage in rigorous debate, strategic negotiation, and collaborative policymaking. Through this forum, participants are placed at the centre of an unfolding international crisis, where economic stability, geopolitical tensions, and strategic decision-making intersect.

The theme of **Recessus Consensus 2026 — “Defining Tomorrow’s World”** — reflects the rapidly evolving nature of international relations and economic governance. The modern global economy is deeply interconnected: disruptions in energy supply, maritime trade routes, financial markets, or political alliances can trigger cascading effects across continents. In this environment, decision-makers must navigate complex and often competing interests while attempting to maintain stability and cooperation.

This year's simulation revolves around the **International Board for Economic Stability and Welfare (IBESW)**, an emergency multilateral body formed in response to a coordinated threat against the global economic order. Participants will represent influential nations and international organisations tasked with responding to escalating crises affecting global trade, financial systems, and geopolitical stability. Delegates must negotiate with allies and adversaries alike, balancing ideological commitments with pragmatic solutions in order to prevent a potential global recession.

Unlike traditional debate formats, Recessus Consensus incorporates a **crisis-driven structure**, where developments may unfold unpredictably throughout the event. Delegates will be required to react swiftly to evolving situations, draft policy responses, form strategic alliances, and vote on critical ordinances that shape the trajectory of the simulated world economy.

Ultimately, the objective of Recessus Consensus is not merely to debate economic theory, but to place participants in the role of global decision-makers. Through this experience, delegates will gain insight into the complexities of international economic governance, the pressures of crisis management, and the delicate balance between national interests and global stability.

Overall Summary

Committee

International Board for Economic Stability and Welfare (IBESW)

Agenda

“Coming to a Consensus to Prevent an Impending Global Recession Amid the Triple Naval Threat.”

Topic Area Summary

A covert shadow organisation identifying itself as the Association of Brutal and Bloody Acquisition (ABBA), operating under the command of Operative Frida and Operative Agnetha, has emerged as a destabilising force targeting the foundations of the global economic system. The organisation has openly declared war against the organised global economic structure and has vowed to exploit protectionist trade policies, geopolitical rivalries, and vulnerabilities in international commerce to precipitate a global recession. ABBA has announced a coordinated strategy known as the Triple Naval Approach, which focuses on three primary mechanisms of disruption: Naval Warfare, Maritime Trade Interference, and Manipulation of the Law of the Seas. Given that a vast majority of global trade is conducted through maritime routes, any disruption to shipping lanes, ports, or maritime legal frameworks could generate cascading shocks throughout the global economy. Energy shipments, industrial supply chains, and food trade networks remain particularly vulnerable to such disturbances. Recognising the magnitude of the threat, major economic and geopolitical actors—including India, France, the United Kingdom, the United States, Russia, China, Japan, South Korea, Israel, Saudi Arabia, and the European Union—have formed an uneasy yet urgent alliance. This collaboration has led to the establishment of the International Board for Economic Stability and Welfare (IBESW), a multilateral body tasked with coordinating responses to prevent economic destabilisation.

The committee must therefore balance economic stability with strategic maritime security. Its deliberations will determine whether coordinated international action can safeguard global trade systems and financial markets, or whether ABBA’s campaign will succeed in triggering a systemic global recession.

Topics of Substantive Debate

1. Preventing a Global Recession in an Era of Maritime Disruption

Delegates must assess the potential economic consequences of sustained maritime instability, including supply chain disruptions, inflationary pressures, declining investor confidence, and contraction in international trade. Strategies for coordinated fiscal and monetary responses will be central to preventing a global downturn.

2. Security of Maritime Trade Routes and Global Supply Chains

With global commerce heavily dependent on maritime transport, delegates must evaluate mechanisms to safeguard shipping routes, ports, and maritime logistics infrastructure. Joint naval coordination, international maritime security frameworks, and protection of key trade corridors will be critical considerations.

3. The Economic Impact of Naval Conflict

The militarisation of maritime zones may escalate tensions between major powers and disrupt trade flows. Delegates must deliberate on how naval deployments, blockades, or maritime confrontations could affect global markets, energy prices, and industrial production.

4. Reforming and Protecting the Law of the Seas

The manipulation of maritime legal frameworks threatens freedom of navigation and the stability of international maritime governance. Delegates must examine the role of international law in addressing hybrid maritime threats posed by non-state actors.

5. Trade Policy, Tariffs, and Economic Fragmentation

Protectionist policies and retaliatory tariffs have already strained global trade relations. Delegates must debate whether tariff regimes strengthen domestic economies or exacerbate economic fragmentation during times of crisis.

6. Coordinated Global Economic Stabilisation Measures

To mitigate recessionary pressures, the committee must explore multilateral approaches including coordinated monetary policies, trade cooperation mechanisms, maritime security alliances, and crisis-response frameworks designed to preserve economic stability.

Event Structure

Committee Procedure and Crisis Mechanics

Opening of Committee

At the commencement of the session, the **Event Co-Ordinator and/or Event Head** will conduct **Roll Call** to establish attendance and quorum. Each representation will respond when called.

Once the roll call is complete, the committee will enter **Open Floor Discussion**. During this period, delegates are encouraged to engage in dialogue regarding major global economic issues relevant to the committee's agenda, including financial stability, trade flows, energy markets, supply chain vulnerabilities, and broader geopolitical tensions affecting the global economy. **Each delegate will receive a period of 60 seconds to speak at the discretion of the Event Co-Ordinator and/or Event Head.**

The open floor allows delegates to understand the positions of other nations, identify potential allies, and begin forming informal blocs or alliances.

Crisis Intervention Mechanism

At any point during open discussion, the flow of committee proceedings may be interrupted by the introduction of a **Crisis Event**. These crises represent simulated developments affecting the global economy and will require immediate action from the committee.

Each crisis will be introduced through the following sequence:

Crisis Video

A short video presentation will be displayed to the committee illustrating the unfolding crisis scenario and providing contextual information regarding its geopolitical and economic implications.

Crisis Documentation

After the video, an official **Crisis Dossier** will be circulated through the committee chatbox.

This document will include:

- Detailed explanation of the crisis

- Regions or sectors affected
- Projected economic consequences
- Immediate global impacts
- Possible escalation scenarios
- Areas where the committee is expected to respond

Delegates are expected to review this document carefully before proceeding to negotiations.

Crisis Resolution Phase

After the crisis documentation has been distributed, the committee will **adjourn sine die into an unmoderated recess**.

The length of the recess will depend on the severity of the crisis:

During this time, delegates must negotiate and draft **three separate crisis solutions**, referred to as **Ordinances**.

Requirements

- Three distinct ordinances must be produced by **three separate blocs or alliances** of delegates.
- Each ordinance must clearly outline the strategy for resolving the crisis.
- Proposed policies should remain consistent with the **ideological positions and foreign policy stances of the represented nations**.

Resolution Deliberation Procedure

Once the recess concludes, the committee will reconvene to deliberate on the submitted ordinances.

At the discretion of the **Event Co-Ordinator and/or Event Head**, deliberation will proceed as follows:

1. Presentation of Ordinance by the Security First Bloc
2. Questions from the Floor regarding Ordinance by the Security First Bloc
3. Questions from the Event Co-Ordinator and/or Event Head regarding Ordinance by the Security First Bloc
4. Presentation of Ordinance by the Stability First Bloc
5. Questions from the Floor regarding Ordinance by the Stability First Bloc
6. Questions from the Event Co-Ordinator and/or Event Head regarding Ordinance by the Stability First Bloc
7. Presentation of Ordinance by the Nation First Bloc

8. Questions from the Floor regarding Ordinance by the Nation First Bloc
9. Questions from the Event Co-Ordinator and/or Event Head regarding Ordinance by the Nation First Bloc

Voting Procedure

After deliberation concludes, the committee will proceed to **single-choice voting** on the proposed ordinances. Delegates may vote in favour of **only one ordinance**. It is technically possible for the committee to reject all three ordinances; however, doing so is strongly discouraged as it represents a failure to provide a coordinated response to the crisis.

After voting concludes, the ordinance that satisfies the required threshold will be adopted. Following the resolution of the crisis, the committee will return to **open floor discussion** until another crisis event occurs.

This cycle may repeat multiple times throughout the session. At the **conclusion of the day**, a **final crisis scenario** will be presented summarizing the overall status of the global economy and the consequences of the committee's decisions.

Representation-Based Voting System

Voting in the committee operates under a **grouped representation system**.

Each nation is represented by a delegation consisting of several members, collectively referred to as a **Representation**.

Voting Requirements

For a representation to formally support an ordinance, the following conditions must be met:

- **At least two-thirds of the members of a representation must vote in favour,**
OR
- **The Head of State and at least one-fourth of the remaining members must vote in favour.**

Abstentions

Members of a representation may abstain from voting. However:

- **The Head of State may never abstain from voting.**

If **more than half of the members of a representation abstain**, the vote of the **Head of State automatically determines the final position of the representation**. Delegates are strongly discouraged from excessive abstentions.

Tie-Breaking

If the internal vote within a representation results in an equal division, the **decision of the Head of State will determine the final vote of the representation**.

Exceptional Authority of the Head of State

In extraordinary circumstances, the Head of State may override internal disagreement within their delegation in order to determine a unified national position.

Passage of Ordinances

For an ordinance to be adopted by the committee:

- **More than half of all present representations must vote in favour of the ordinance.**

The exact threshold may be adjusted slightly depending on attendance levels, at the discretion of the **Event Co-Ordinator and/or Event Head**.

Only ordinances meeting this requirement will be formally adopted as the committee's official response to the crisis.

Allocation Matrix

Notes

1. All names mentioned in this document are entirely fictional and bear no intentional resemblance to real individuals. They have been created solely for the purpose of simulation and should not be interpreted as representations of actual political figures or policymakers.
2. Participants are assigned to specific country representations, referred to as *Representations*. Each representation consists of four officials representing key positions within the respective nation's leadership. These officials collectively form a single national delegation and are expected to deliberate and vote in accordance with the broader interests and policy orientation of their assigned country.
3. For the purposes of committee proceedings, the fifteen participating nations have been organised into three blocs, each consisting of five countries. Every bloc reflects a distinct strategic outlook and policy priority in addressing the agenda of the committee. Delegates are expected to work closely with the members of their assigned bloc to develop coordinated responses to the crises presented during the event.

Each bloc is responsible for drafting one ordinance during the crisis resolution phase. While collaboration within blocs is encouraged, delegates must ensure that their proposals remain consistent with the national interests and policy orientations of their assigned country.

Participants are encouraged to research the general foreign policy stance, economic priorities, and strategic interests of their allocated country. While individual names in the document are fictional, the national policies and ideological tendencies represented should reflect realistic geopolitical positions.

Security First Bloc

Agenda: Preserve the liberal international economic order by defending maritime trade routes, enforcing international maritime law, maintaining naval security across global shipping lanes, and responding decisively to actors attempting to destabilise the world economy.

Representation	Officials	Policy Orientation
United States of America	<i>President: Sebastian Rosenfeld</i> Vice President: Janice Hardwall Secretary of the Treasury: David Johnson Secretary of State: Emily Morpugo	Maintain naval dominance and secure global trade routes
United Kingdom	<i>King: Sir Maxwell</i> Prime Minister: Oliver Grant Whitmore Chancellor of the Exchequer: Amelia Rose Kensington Foreign Secretary: Thomas Edwin Clarke	Defend maritime law and global financial markets
State of Israel	<i>President: Ronen Shalev</i> Prime Minister: Eitan Barak Levi Finance Minister: Noam Adler Foreign Affairs Minister: Yael Ben-David	Security-first approach and intelligence operations
Imperial State of Japan	<i>Emperor: Haruto Nakamura</i> Prime Minister: Aiko Tanaka Finance Minister: Kenji Watanabe Foreign Minister: Takumi Saito	Protect sea lanes and maritime imports

Representation	Officials	Policy Orientation
Republic of Korea	<i>President: Min-Jae Park</i> Prime Minister: Soo-Yeon Kim Finance Minister: Jin-Woo Han Foreign Minister: Tamar Hadari	Secure export supply chains and trade routes

Stability First Bloc

Agenda: Prevent systemic recession through coordinated fiscal policy, strong regulatory oversight, multilateral diplomacy, and stabilisation of global financial markets while maintaining the rules-based international economic system.

Representation	Officials	Policy Orientation
Fifth French Republic	<i>President: Lucien Moreau</i> Prime Minister: Élodie Garnier Minister of Economy and Finance: Marc Dubois Foreign Affairs Minister: Antoine Lefèvre	Multilateral economic cooperation
Federal Republic of Germany	<i>President: Jonas Schäfer</i> Federal Chancellor: Hannah Krüger Finance Minister: Lena Hoffmann Foreign Minister: Maximilian Vogel	Protect industrial trade networks
European Union	<i>President of the European Council: Isabella Romano</i> President of the European Commission: Matteo Schneider Commissioner for Economy: Claire Van High Representative for Foreign Affairs: Jonas Keller	Maintain rules-based economic order

Representation	Officials	Policy Orientation
Swiss Confederation	<i>President of the Federal Council: Matthias Alder</i> Vice President: Emilia Vogel Head of Finance Department: Clara Baumgartner Head of Foreign Affairs: Lukas Reinhardt	Financial stability and neutrality
African Union	<i>Chairperson: Thabo Ndlovu</i> Deputy Chairperson: Amina Diop Finance Commissioner: Kofi Mensah Foreign Affairs Commissioner: Lindiwe Okafor	Protect emerging economies from recession

Nation First Bloc

Agenda: Protect national sovereignty over strategic resources, resist domination by Western economic coalitions, secure regional trade corridors, and maintain independent economic policies in response to global instability.

Representation	Officials	Policy Orientation
Union of India	<i>President: Shri. Vivaan Sinighal</i> Prime Minister: Shri. Divyansh Chinnaswamy Iyer Finance Minister: Smt. Anandita Daikwat External Affairs Minister: Smt. Arunima Choudhary	Strategic autonomy and economic nationalism
People's Republic of China	<i>General Secretary: Zhou Ren</i> Premier: Liu Qiang Finance Minister: Huang Yichen Foreign Affairs Minister: Gao Wen	State-controlled economic stability
Russian Federation	<i>President: Viktor Mikhailov</i> Prime Minister: Sergei Antonenko Finance Minister: Irina Volnova Foreign Minister: Oleg Voronin	Energy leverage and geopolitical autonomy

Representation	Officials	Policy Orientation
Kingdom of Saudi Arabia	<i>King: Prince Khalid Al-Mansour</i> Prime Minister: Fahad Al-Rashidi Finance Minister: Hassan Al-Qahtani Foreign Minister: Majid Al-Harbi	Protect global energy exports
Arab League	<i>Secretary General: Omar Khalil</i> Deputy Secretary General: Nabil Haddad Finance Commissioner: Samira Al-Khatib Foreign Affairs Commissioner: Youssef Darwish	Regional sovereignty and resource control

Format of Ordinance

Stick to the below format exactly including textual formatting.

Ordinance of the ____ First Bloc on Crisis #__: _____

Authored by **(only one)** *His/Her Excellency*, _____, *the* _____ *of* _____ and **(minimum one, maximum two)** *His/Her Excellency*, _____, *the* _____ *of* _____ and *His/Her Excellency*, _____, *the* _____ *of* _____.

Sponsored by: **(minimum 5)**

1. *His/Her Excellency*, _____, *the* _____ *of* _____
2. *His/Her Excellency*, _____, *the* _____ *of* _____
3. *His/Her Excellency*, _____, *the* _____ *of* _____
4. *His/Her Excellency*, _____, *the* _____ *of* _____
5. *His/Her Excellency*, _____, *the* _____ *of* _____

It is proposed to the Honourable Committee of the International Board for Economic Stability and Welfare that, in light of the ongoing global crisis, the following measures be enacted:

1. Measure 1
 - a. Sub-point a
 - b. Sub-point b
 - i. Sub-sub point i
 - ii. Sub-sub point ii
2. Measure 2
3. Measure 3
4. Measure 4
5. Measure 5
6. Measure 6
7. Measure 7

If adopted, this ordinance shall take immediate effect.

Sample Ordinance

Ordinance of the Nation First Bloc on Crisis #67: President Drump Invades Greenland

Authored by *His Excellency, Babir Anerjee, the President of the Republic of India* and *Her Excellency, Siya Jampat, the Foreign Minister of the Kingdom of Saudi Arabia* and *His Excellency, Rabeel Nanawadia, the Premier of the People's Republic of China*.

Sponsored by:

1. *Her Excellency, Lhika Sele, the Finance Commissioner of the Arab League*
2. *His Excellency, Pryaman Aeriwal, the Prince of Saudi Arabia*
3. *Her Excellency, Shayu Ivoor, the Prime Minister of the Russian Federation*
4. *His Excellency, Prjun Aatel, the Secretary General of the Arab League*
5. *Her Excellency, Tara Panawala, the Finance Minister of India*

It is proposed to the Honourable Committee of the International Board for Economic Stability and Welfare that, in light of the ongoing global crisis, the following measures be enacted:

1. An **International Emergency Arctic De-Escalation Mission (IEADEM)** shall be immediately established under the authority of the International Board for Economic Stability and Welfare in order to restore stability to Greenland following the invasion ordered by President Tonal Drump.
 - a. The mission shall deploy a joint delegation of diplomats, economists, and extremely confused geographers to Greenland in order to determine how the invasion occurred and whether the island was mistakenly identified as a “large iceberg with oil”.
 - b. The delegation shall establish a temporary monitoring station in Nuuk to observe military activity and confirm that Greenland remains geographically attached to the Kingdom of Denmark.
 - i. Satellite imagery shall be used to verify that Greenland has not been renamed “Greater Florida”.
 - ii. Any attempts to redraw Arctic borders using a permanent marker on a classroom map shall be considered invalid.
2. An **Immediate Arctic Demilitarisation Corridor** shall be created across Greenland to prevent further escalation between the United States and other concerned nations.
 - a. All foreign military units currently operating in Greenland shall be required to withdraw to a distance of no less than 500 kilometres from the island.
 - b. Any military equipment already deployed shall be temporarily reassigned to peaceful uses including snow removal, penguin observation, and emergency sled transport.
3. A **Special Economic Stabilisation Program for Arctic Trade** shall be enacted in order to prevent global supply chain disruption resulting from the invasion.

- a. Emergency shipping corridors shall be established to ensure that vital trade routes through the Arctic remain open.
 - b. A temporary international task force shall monitor economic effects caused by sudden global demand for parkas, sled dogs, and maps of Greenland.
- 4. An **Independent Investigation Commission** shall be formed to determine the strategic reasoning behind the invasion ordered by President Tonal Drump.
 - a. The commission shall review official statements, social media posts, and late-night policy decisions made after midnight.
 - b. If it is determined that the invasion occurred due to a misunderstanding of the difference between “buying Greenland” and “invading Greenland”, a formal clarification shall be issued to all world leaders.
- 5. A **Global Diplomatic Dialogue on Arctic Governance** shall be convened to ensure that no nation attempts to annex large landmasses simply because they appear empty on a map.
 - a. Participating states shall reaffirm the principle that territories may not be claimed merely because they are cold, large, and visible from space.
 - b. Educational workshops shall be conducted to ensure future leaders understand basic geography and the difference between Greenland, Iceland, and “that big white thing near Canada”.

If adopted, this ordinance shall take immediate effect.

Rubric of Evaluation

Criteria	Maximum Possible Marks
Research	30
Paperwork	50
Speech	50
Lobbying	50
Decorum	20
Impact	25
Bonuses for well-researched paperwork, excellent speeches, relevant content, etc. at the <u>SOLE DISCRETION OF THE EVENT CO-ORDINATOR</u>	25
Total Maximum Possible Marks	250

The three highest scorers in the CR-J Section and the three highest scorers in the CR-S Section will be awarded Best Representative, Outstanding Representative, and Honourable Mention in their respective categories.

Concluding Remarks

Recessus Consensus is designed as an immersive experience that places participants at the centre of a rapidly unfolding global crisis. Throughout the course of the event, delegates will be expected to think critically, respond decisively, and collaborate effectively while representing the interests of their assigned nations. The simulation is structured to mirror the pressures of real world decision making, where information evolves quickly and policies must often be formed under conditions of uncertainty.

Participants are encouraged to approach the committee with preparation, intellectual curiosity, and a willingness to engage constructively with other delegates. Meaningful participation in open floor discussions, careful analysis of crisis developments, and thoughtful negotiation during recess periods will be essential to the success of both individual representatives and the committee as a whole. The quality of debate, diplomacy, and policy formulation will ultimately determine how effectively the committee responds to the challenges presented.

Delegates should also recognise that the event values professionalism and respectful discourse. While disagreements between blocs and national interests are an inherent part of the simulation, these differences should be addressed through reasoned argument, research, and strategic collaboration. Strong representation requires not only persuasive speaking and well drafted ordinances, but also the ability to listen carefully, build alliances, and contribute to the collective functioning of the committee.

We hope that Recessus Consensus provides participants with an opportunity to engage deeply with questions surrounding global economic stability, maritime security, and international cooperation. By placing students in roles that demand leadership, adaptability, and strategic thinking, the event aims to cultivate a deeper appreciation of the complexities involved in maintaining global stability.

We look forward to witnessing the thoughtful debate, innovative solutions, and spirited diplomacy that will emerge over the course of the committee. The direction of the simulated world economy now rests in the hands of its delegates.
